IMPORTANT SAFETY INFORMATION: i-Port Advance injection port is indicated for patients who administer, or to whom is administered, multiple daily subcutaneous injections of physician prescribed medications, including insulin. The device may remain in place for up to 72 hours to accommodate multiple drug injections without the discomfort of additional needle sticks. Site infection and/or irritation is a risk. Patients experiencing such symptoms should immediately consult their healthcare provider and/or discontinue use. For complete details, please consult i-Port Advance product user guide.
