MEET PENNY

A mobile diabetes app by Medtronic, that helps you to get the best out of your time in therapy, wherever you are.

Simple and convenient to use, Penny gives you direct access to all the information and services you need while in therapy – all from one place.

What you can enjoy with Penny:

- Therapy insights direct from your CareLink™ data
- Instant advice
- Personalised and extensive resource library
- Online shop
- Tips on nutrition, lifestyle, sports & mental health

Easy & convenient therapy insights

Library on the go

Immediate answers

With a choice of iOS or Android, you can feel assured you have the best advice whatever pump you use, wherever you are. Whatever you're facing, you're not alone - Penny is always by your side.

Download for free on the Apple Store® or Google Play™ Store

Medtronic

Important: Existing CareLink™ Users - Penny and CareLink™ use the same login credentials (you use the same username and password for both). However, if you have multiple CareLink™ accounts that use the same email address (eg one for yourself and one as a guardian / parent) then you will need separate email addresses in each CareLink™ account in order to sign into Penny. This is because Penny requires a separate email address login for each account.
